

# Risk Management (analysis and mitigation planning)

Course length: 2 days

Reed Business School has developed a series of Continual Professional Development Workshops to uniquely enable Supervisors, Managers and Senior Managers to drive a measurable difference in their performance of their teams and organisations.

Finding interesting, engaging and valuable CPD becomes more and more difficult as you progress up the 'career ladder'. There are plenty of 'technical updates', and 'management skills' courses available, but a real shortage of practical CPD opportunities which give you the skills to add value at the strategic level and work on your firm's competitive advantage.

Techniques are practiced in an open and flexible training environment, ensuring that skills are learnt through doing as well as talking. All discussion is focused on practical application of skills in the workplace to make sure it is as valuable as possible.

## Course objectives:

- Identify risks
- Classify risks
- Assess risks
- Plan a mitigation for each risk identified
- Construct a risk register
- Manage risk at a board/partner level

## Who is this course for?

Each module will be precisely tailored to the industries in which delegates currently work, or express an interest in exploring further. If you are a Director, Partner, Senior Manager or potential entrepreneur, these are the CPD courses for you.

# Risk Management (analysis and mitigation planning)
